1. Babakan House

Babakan House is a private house that located in Canggu area, Bali. A house for a perfect ambiance between the trees. It furnishes a relaxing pool by the house terrace. The material of woods were put around the house as an accent, and it visually unites the spaces of house.

2. Desa Hay

Desa Hay consists of six villas in a bungalow-shaped. Every villa is separated by lush plantation. The entrance of the villa is precisely like the Bali's traditional front gate, making the guests feel welcomed and comfortable. Every villa has the facilities of a bedroom, a semi-outdoor bathtub, and a private pool. The private pool uniquely place at the front of the villa. The building has windows that can be opened so people can see the private pool and nature's view nicely

3. J House

Rather than an uphill site, this house is on the downhill site with the river as the view.
The swimming pool is designed to have an infinity feeling with the surroundings, especially the river.

4. Small House Design Competition

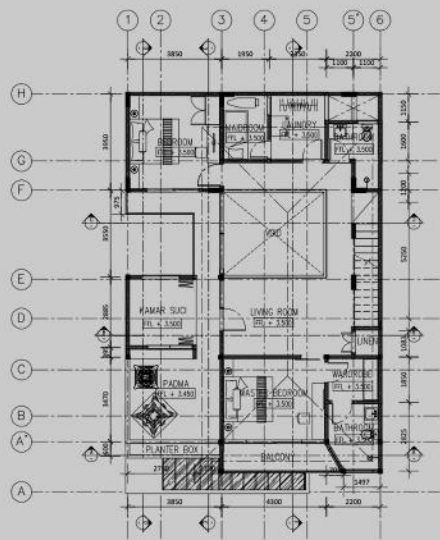

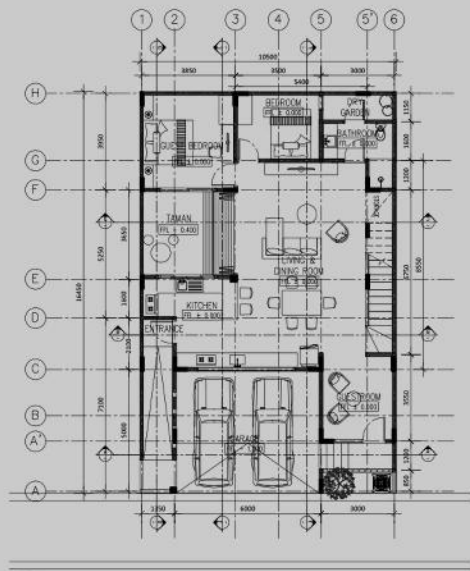

A house that settles in the dense part of Denpasar, maximizing the given site by creating spaces that breathe, full of natural light, and embracing the garden

5. Buluh Indah House

The modern tropical concept is applied with a minimalist house shape and the application of white walls and wood materials which are also tropical natural color accents from the looks of this house project.
